

EXCAVATOR LOADER | ICX / ICXT / 2DX

# SITE MASTER

THE ONE MACHINE FLEET

GROSS POWER  
**36kW (49hp)**

MAX DIG DEPTH  
**3.08m**

SHOVEL CAPACITY  
**0.32 - 0.55m<sup>3</sup>**

# SITEMASTER OF VERSATILITY.

The ICX and 2DX compact excavator loaders are two of the most versatile machines in the world. By combining an excavator and loader, you get two machines in one.

## SITEMASTER OF ALL JOBS

The world's best-selling excavator loaders help you master digging, loading and rehandling, making them the perfect replacement for costly, time-consuming manual labour.

# SITEMASTER OF PERFORMANCE.

Our multi-purpose rear excavator minimises repositioning; it also enables easy digging parallel to walls or in an off-centre position for better visibility when working.

## RELIABILITY AND DURABILITY

The JCB Sitemaster is a purpose built excavator loader and our durable loader arm design has high breakout forces and lift capacity.

# SITEMASTER OF POWER & EFFICIENCY.

We've installed a powerful engine in these compact, agile machines, which together with their loading and digging capabilities enable them to tackle the toughest jobs.

## GREATER POWER

Impressive power, equivalent to a 2.5 tonne mini excavator is accompanied by an optional extending dipper on the ICX, which results in dig depth of 3.08m.

# SITEMASTER OF THE ROAD.

The JCB Sitemaster excavator loader can drive direct to site without the need to wait for a lorry or trailer, saving both time and money.

## GREATER PRODUCTIVITY

The optional 6-in-1 shovel allows you to load, dig, doze, grab, grade and backfill, eliminating manual labour and ensuring greater productivity.

# SITEMASTER OF COMFORT.

The Sitemaster cab is designed around the user, for day-long operator comfort plus ergonomic and intuitive controls.

## EASE OF USE

A narrow boom and dipper enable exceptional trenching performance while a sloping front bonnet provides a clear view of the shovel, maximising the amount of material moved.

## ICX

The JCB ICX is the world's smallest excavator loader, offering skid steer and excavator performance in one package. The ICX can turn through 360 degrees on its own axis. Combined with its compact dimensions, you have an ideal machine for cramped sites, basement areas and busy city centres.

## ICXT

Wide tracks reduce ground pressure and damage and give the ICX incredible stability on inclines and traction in wet and tough conditions, enabling it to work where wheeled machines would not be able to access.

## 2DX

The 2DX compact excavator loader has a 0.55m<sup>3</sup> shovel capacity for high output and is far more productive than a tractor loader. It also has a four speed transmission capable of a 28km/h top speed, for fast travel, both on and off site.

## SPECIFICATION.

MODEL	ICX	ICXT	2DX
Engine	2.2L Nat Asp	2.2L Nat Asp	3.2L
Power	36.3kW (49hp)	36.3kW (49hp)	36.9kW (49.5hp)
Torque	143Nm	143Nm	203Nm
Transmission	Hydrostatic	Hydrostatic	Syncro-shuttle
Dig depth	2.55m fixed or 3.08m extending	2.55m fixed or 3.08m extending	3.02m
Shovel capacity	0.32m <sup>3</sup>	0.37m <sup>3</sup>	0.55m <sup>3</sup>
Load over height	2.51m	2.65m	2.81
Hydraulic flow	45 l/min or 100 l/min high flow	45 l/min or 100 l/min high flow	69 l/min
Operating weight	3,158 - 3,254kg	4,262 - 4,342kg	4,530kg
Wheels	16", 16"	-	16", 24"
Tracks	-	Standard	Wheeled only
Cab/Canopy	Canopy or cab	Canopy or cab	Canopy only
