

# Ranger DX700 T3 SURFACE DRILLS

Technical specification

Ranger DX700 is a hydraulic, self-propelled, self-contained, crawler based surface drilling rig equipped with a cabin (F.O.P.S. and R.O.P.S.) and rod handling system.

Typical applications for Ranger DX700 are road cutting, pipe-line drilling and foundation drilling, as well as production drilling in medium size quarries. Therefore Ranger DX700 is most often used by construction contractors, mines and quarries, and also included in the equipment fleet of rental houses as well.
